

Pipeline for FOPPL-DHMC

Bradley Gram-Hansen

November 7, 2017

Abstract

1 Pipeline

On the top level this is what we must accomplish:

- Once completed bundle BUGS compiler, FOPPL-compiler and Pytorch interpreter into a [clojars](#) library.
- Create pip install package for DHMC so that all python packages and libraries are installed [Use this]
- Create Unit tests for both FOPPL and DHMC.
